

Pranish Acharya

Student

Seeking for a organization where I can put my knowledge to good use and improve my skills to help me achieve my career goals as well as the organization's. I'd like to improve my personal skills by working in a challenging environment where I can learn new things, prove myself, and contribute to the organization's success while gaining valuable experience.

Web Scraping using BeautifulSoup library in Python

Health Care Chatbot System Using Rasa and Django Framework (2020 - 2021)

Built a HealthCare Chatbot System (FYP) with CRUD operations for making appointments with doctor. And patients can view their personal health records and make queries with the chatbot system about their disease and symptoms. Dynamic URL routing, function-based views, adding users to Django groups (3 types of users – admin, doctor and Patients), etc.
